## Evening Brief

Date: Monday June 29<sup>th</sup>, 2020

---

### Weather Summary

Temperatures remain cool with scattered showers across the north for one more day today while warmer and drier weather begin to move into Nevada with generally light winds. Breezy winds return to the central Great Basin on Wednesday and Thursday ushering in a drier airmass as well. Temperatures continue to rise through the work week and will reach seasonal normals by the weekend.

A limited amount of moisture moving north through NM into eastern Utah may produce isolated to widely scattered mountain thunderstorms Friday through Sunday.

### Preparedness Levels & Great Basin Fire Activity (from WFDSS)

Great Basin	3	Light Initial Attack Activity
National	3	New Fires and Acres: 4 fires 1,010 acres; 57,899 acres large fire growth

---

### Great Basin Fuels/Fire Potential

Fuels are in a state of flux currently with the ongoing cool, moist conditions across much of the area. Idaho and Western Wyoming will remain non critical, with fuel moisture lagging several weeks behind schedule.

Fuels across Nrn NV-Nrn UT will also remain non critical for the next few days, but will rapidly dry out to critical levels by later this week as a significant warming/drying trend develops.

Fuels across the southern half of NV-UT and the Az Strip will modify only slightly the next 1-2 days with the cooler temperatures and increase in humidity, but will quickly fall back to critical levels.

### Resources:

#### **Aviation within the Great Basin**

- 1 VLAT's, 4 LATs
- 19 SEATs, 0 Fire Bosses
- 7 Type 1 Helicopters / 7 Committed
- 9 Type 2 Helicopters / 9 Committed
- 12 Type 3 Helicopters

#### **Crews Committed within the Great Basin**

- 11 IHCs Committed / 9 MOB
- 17 T-2 IAs Committed / 18 MOB

## Current Incident Details
